

EZ

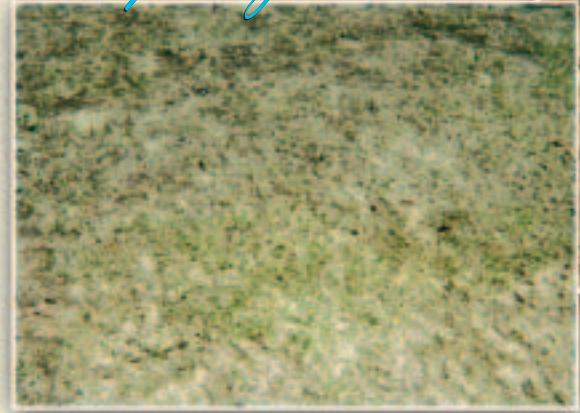

Spray 50/50 BLEND

PAPER/CORN FIBER BLEND HYDRAULIC MULCH

- Low Density, Low Moisture Bale
- Mixes Easily in All Types of Hydroseeders
- Sprays Better For Even Applications
- Superior Wettability Results in Superior Pumpability
- Cleanest Mulch Available Means Less Down Time, Less Wear and Tear
- Available in 40 lb. and 50 lb. Bales
- Heat-Sealed, Heavy-Duty Poly Bags Can Be Stored Outside
- Made From a Patented Combination of 100% Biodegradable Newsprint and Corn Fiber

EZ Spray + 3" RAIN

70/30 WOOD/PAPER + 3" RAIN

Improved fiber, length and integrity.

APPLICATION RATE	# PER ACRE
4:1 Slope	1250
3:1 Slope	1500
2:1 Slope	2000

Spray

PAPER/CORN FIBER BLEND HYDRAULIC MULCH

EZ Spray, manufactured from a patented combination of premium newsprint and corn fiber, provides a versatile, cost effective alternative to wood and wood/paper hydraulic mulches.

EZ Spray mixes easily due to the low bale density and the addition of premium surfactant and de-foamers. EZ Spray is the cleanest product available, which results in less down time and less wear and tear on equipment.

The unique blend of paper and corn fiber promotes germination, minimizes erosion, and improves seed to soil contact. EZ Spray is available in both 40 and 50 pound bales with and without 2% guar gum tackifier. The guar gum tackifier improves pumpability and binds the fibers not only to themselves, but also to the soil surface. This forms a moisture absorbing barrier that incubates and protects the emerging seedlings.

TECHNICAL DATA *	
Moisture Content	10% ± 3%
pH	6.5 ± .4
Organic Content (min)	95%
Inorganic (Ash) Content (max)	5%
Water Holding Capacity (min)	1200%
CA DOT	U.S. PATENT #6,523,299

* Meets or exceeds requirements for wood cellulose mulch.
